Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-6, 9, 12-16 and 18 are rejected under 35 U.S.C. 102(a) as being anticipated by Wong (US 6,377,075).

3. With respect to claim 1, figure 2 of Wong discloses a circuit coupled to an output device (circuit of Figure 2), the circuit comprising at least one transistor device comprising at least one p-channel transistor device (M4), said at least one transistor device adapted to limit a duration of a high voltage across the output device thereby reducing hot carrier injection stress (see abstract).

4. With respect to claim 2, figure 2 of Wong discloses two stacked transistor devices (Me, M4).

5. With respect to claims 3 and 4, figure 2 of Wong discloses at least one p-channel transistor (M2) coupled to the output device.

6. With respect to claims 5 and 6, figure 2 of Wong discloses a circuit comprises at least one n-channel output transistor (M3).

7. With respect to claim 9, figure 2 of Wong discloses an integrated circuit comprising:

an I/O PAD (pad coupled to 15);
an output circuit (circuit of figure 2) coupled to at least said IO PAD; and
a stress circuit comprising at least one p-channel transistor (M4), said stress circuit coupled to at least said output circuit and adapted to limit a duration of a high voltage across said output circuit when said output circuit is enabled, thereby reducing stress on said output circuit.

8. With respect to claim 12, figure 2 of Wong discloses two stacked p-channel transistors (M2, M4)

9. With respect to claims 13-15, figure 2 of Wong discloses the output circuit comprises at least one transistor (M2, M3).

10. With respect to claims 16 and 18, the methods therein are inherent given the apparatus of Wong as shown in the above rejections.

Conclusion
